Note checking and deposit system

Made in Italy 

Bunker is a complete safety system for your money.

It is comprised of two parts: the Detector Plus, a device to check banknotes (described on another page of this catalogue) and a very thick steel case used to store it, namely the Bunker.

Inside the front part of the Bunker, the Detector Plus checks the banknotes; when this operation is complete, the banknotes are fed through a special diaphragm that makes them non-retrievable and are then deposited in the safe at the back of the Bunker.

A door with a pre-set opening protects the safe against any outside intervention. If tampering is attempted, a sound alarm is also set off. The system is fitted with a chip-card to access the security system (SECURITY), and one for the currency check. The use of the system is made even safer thanks to the standard supply of a sturdy steel safety cable with a fastening plate to attach the device to a variety of support surfaces.

Easy access to SECURITY

Insurance Guarantee with refund up to Euro 4000.00 Euro in the event of a robbery or theft

Simple and safe installation

The device is guaranteed with a no-fault insurance policy for all the currencies registered on the chip card, with a refund equal to the value of the banknote incorrectly authenticated. The maximum compensation limit if counterfeit banknotes are accepted is Euro 2,600.00 (two thousand six hundred), per incident and for the duration of the guarantee.

SPECIFICATIONS

CURRENCIES:	SEE LIST OF AVAILABLE CURRENCIES Detector Plus
COUNTING SPEED:	1 second per note
CHECK TYPE:	5 concurrent types of check on the banknotes
WEIGHT:	Approx. 9.5 kg
WIDTH:	15 cm
DEPTH:	42.5 cm
HEIGHT:	15.5 cm
