

Checker

Brand New Euro Note Checking Product!!!

- Product approved by the European Central Bank
- Fitted with a sophisticated and infallible checking system
- Guaranteed by a no-fault insurance policy with a max refund of 500.00 Euro in the event counterfeit banknotes are not recognised
- Powered by rechargeable batteries and 9V power supply (supplied in the package).

Made in Italy

Most of the times, money is cashed by people not able to identify counterfeit notes, but even experts may find it difficult to recognise them, because unfortunately, technology helps counterfeiters too.

This has considerable impacts because besides the missed proceeds there is also the amount of the loss of sold goods.

Now you can fight these illegal activities fitting your sales point with a safe and quick note checking system.

CHECKER is a state-of-the-art note detector that thanks to the use of a sophisticated set of (infrared and magnetic) sensors can read the code on the safety thread of Euro notes.

CHECKER is a product (100% reliable) approved by the European Central Bank (test results are available on the Website of the Europe Central Bank www.ecb.int/bc/cashhand/devices/result/html/index.it.html).
