The "**Storia della lira**" (History of Lira) proves that the currency of a country is more than a means to purchase goods: it is the history itself of that very country.

Browsing through the oldest pictures the elderly will maybe feel some nostalgia while the young will be intrigued by the banknotes used by their parents and grandparents.

"**Storia della lira**" is printed on precious paper and is divided into eight folders. The folder holder is embellished with gold ornaments and pictures with a gold closing ribbon.

This gives the package a nice and attractive look. Besides pleasing the buyer, the product is also suitable as a special gift.
